# D&T Curriculum Road Map

In EYFS, Design and Technology is taught through expressive arts and design. In Key stages 1 and 2, Design and Technology lessons have cross-curricular links to the topics being taught in literacy, history, geography and science.

KS1 pupils are taught to develop their ideas, experiences and imagination. They develop a wide range design, make, test, evaluate techniques. In KS2 pupils improve their mastery of Design and technology techniques, including designing and making items for a purpose with a range of materials.
